The Golden Retriever Club of New South Wales 6th September 2009

It was a great privilege to be asked to come and judge The Golden Retriever Club of New South Wales breed speciality Championship Show. Over all I found your Golden Retrievers in very good muscular condition and carrying the correct amount of weight. I have rarely seen so many good straight fronts, strong pasterns and good feet, pigmentation was generally good to. On a down side there were a few exhibits who were nervous. This is not typical for the breed and I urge you to breed away from this trait.

The dogs were of good size and mostly had correct length of visible leg. Shortness of leg and over angled rear quarters are becoming a major problem in Europe and I was pleased not to find too much in the New South Wales Goldens. The dogs were of excellent quality, I would like to have seen more femininity in the bitches. When I was making my choices I was trying to reward quality and balance this with imperfections. I enjoyed my day and congratulate all the exhibitors on excellent presentation and handling.
