

Golden Retriever Club of New South Wales Championship Show, 2nd May 2010

Critique by *Margaret Bourn*

Thank you for the opportunity to judge so many lovely Goldens. It was a pleasure to have to sort through such depth of quality - the top placings were often only a bee's whisker apart.

General observations. Given the warm weather it was pleasing to see the dogs coping well with my demands for them to move quite a bit. A well-constructed Golden should move correctly: thus movement provided the point of difference between seemingly well-conformed exhibits on the 'stack'.

Of particular note were consistently good fronts with straight, well-boned legs, albeit some on the short side. Most shoulders were well-laid back and rear angles were good, but a number of upper arms were not as well angled.

Although there was a wide variety of heads - from balanced and beautiful to quite plain - good pigment and dark eyes were consistent throughout and apart from the odd exception all had correct bites and full dentition.

The full colour range of coats was represented, but a number were too silky (too much conditioner?) and lacking under-coat.
