

Critique – GRC of NSW Championship Show Sunday September 17th 2017 - Mrs M Morphet

Thank you very much to the GRC of NSW for the honour of being asked to judge one of your two Specialty Shows in September 2017.

Rob and I appreciated very much being picked up from the airport and taken to beautiful hotel by Colleen on Saturday afternoon and it was very kind of Sue McFadden to pick us up on the morning of the show, and Paul Middleton for taking us all the way to the airport after the event on Sunday night. Thank you to Tony Tau. I don't think I have had such an attentive ring steward before. It was nice to meet Dogs NSW Representative Lynn Mansfield who gave of her time to help with the successful running of the show.

Even though much is never visible, it was obvious that an enormous amount of work had gone into the organisation of the weekend events, so a big thank you to the very hard-working committee for putting on great shows for both its members and for the visitors from interstate. Rumour got around that it was an outstandingly well organised show so congratulations to Janelle, Debra and their team for a job well done.

Thank you also must go to photographer Debbie Meagher who was kept busy all day. I appreciate her patience in not complaining when I inadvertently seemed to continually be in her way whilst writing critiques after each class.

Thank you so much to the exhibitors for your entries not least those who travelled long distances for the two shows. Congratulations to all on the pegs on Saturday and Sunday.

As can be seen from last weekend, Judges judge differently and this is a great thing, otherwise there would be no point in have Dog Shows. That said, some of the classes, such as the Intermediate Dog Class, were very competitive, and this coupled with performance on the day, makes it completely understandable how difference often occur.

There was a Trainee Judge sitting ringside who asked me in a break between classes what I was looking for. Trying to answer in a positive manner I told her that I try and keep in mind that breed type should be chosen first and then from those chosen the soundest dogs.

I told her that since Goldens are Gundogs they must be able to move, not at great speed, but in a way that they could work in the field all day, something very important to the keepers in Scotland all those years ago. To this end they are to be balanced, short coupled and stand four square, well angulated front and rear with good bone and a firm level topline. And our Goldens must be presented in hard working condition. I told her that the texture of the coat should be neither too soft nor too wiry, Goldens have a water resistant undercoat which allows the fur to dry very quickly thereby preventing chills

I reflect back to Australia's very first Specialty Championship Show held in Sydney in 1964 which was judged by breeder Mrs Parsons of the famous Torrdale Kennel in the UK. At that show, a young Roger Bridgford was speaking with Mr Parsons, who gave him a piece of advice he has never ever forgotten. Here is what Mr Parsons said. "Sonny boy, if it slopes it ain't a Golden."

To follow on from what Mr Parsons said I believe that if a temperament it faulty it is not a Golden either. And if the beautiful expression is not there one of the breed's hallmarks is absent.

I mentioned on the day that purists in several countries have said that Australia has the best Goldens in the world. It is a very big call but there is no doubt that this country has many very clever breeders

who can consistently produce beautiful dogs - not an easy feat. Most will say that their success begins with an outstanding brood bitch.

As we all know the perfect dog has yet to be born, so without trying to sound unduly fault finding, I'd like to mention some minor points I picked up on after examining the cohort last Sunday, which may be worth considering in the future. A degree of "rolling over the topline" is very common. One of the best movers I have seen in recent years in our breed was Ch Dobro Diamantina who could have carried a gold coin on her back right around the ring. A few tails were too long and/or had a kink on the end which detracted from otherwise lovely outlines. There were a few where the vertical line of the hocks extended well beyond the tail set.

A couple of Golden Retrievers were quite narrow in front. And, of course, there were a number of sloping toplines. A few toplines dipped slightly in the middle. Only a few light eyes were observed. A few I noticed tended to be a little lighter in the bone. A couple of heads were a little strong but I found no bad mouths. A few were a little long and a small number moved a little closely going away. Only one Golden was a little nervous when being first approached but soon settled, a minor puppy, but this was perfectly understandable after a scare in the windy conditions the previous day. Feet were generally of correct shape. I found one Golden whose feet tended to be splayed and one, although were of the correct shape, appeared overly large. Sometimes lately, photos from overseas show Golden Retrievers, particularly puppies, with great long houndlike ears but I didn't feel this was a problem at all last Sunday.

If I could give a piece of advice it is that, even when your Golden is relaxing, do not allow it to stand with a sloping topline or with cowhocks. It is surprising how often judges glance back to compare the exhibit they are going over with others in the class. Also, a Golden coming back to the judge and standing four square certainly enhances its chances. Of course, the amount of work put into the fitness of the dog is so much more obvious than many exhibitors realize. Only a couple of coats were found to be too soft. They often say it is the dog underneath the coat that is important and, of course, that is true but a healthy coat, where it has obviously been regularly looked after can certainly work in one's favour in very competitive competition such as last Sunday.

Please find below short critiques of the individual placegetters as I saw it on the day. Thanks to my husband Rob for taking some amateur shots as a memory of the day, one which I will remember always.

Wishing everyone all the very best for the future with your beautiful Golden Retrievers.
